DETAILED ACTION

1. Applicant's amendments dated 8/4/03 and 11/4/03 have been received in application serial number 10/021,797. Claim 2 has been canceled.

Response to Arguments

2. Applicant's arguments with respect to claims 1-17 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 3, 7, 14 and 15 rejected under 35 U.S.C. 103(a) as being unpatentable over by Isreal 6,013,101 in view of Kurilov RU 2014038. Isreal discloses the invention as claimed comprising: An IOL having an optical axis (38) with a first optic (14); and first and second translation members extending from the first optic (22); and wherein upon implantation of the lens in an eye and in response to a force by the ciliary muscle of the eye the translation members translate substantially along the optical axis (see col. 11, lines 53-55 and col. 4, lines 19-27)

Art Unit: 3738

however Isreal does not teach a shape memory material. Kurilov RU 2014038 teaches an IOL that utilizes the material nickel-titanium alloy (see abstract line 4). It would have been obvious to one having ordinary skill in the art at the time the invention was made to take the translation members of Isreal and make them from the shape memory material as taught by Kurilov because the material would further help the members to return to respond to shape changes during the response to a force by the ciliary muscle of the eye. See col. 3, lines 51-56, col. 4, lines 20-23.

Allowable Subject Matter

5. Claims 5-6, and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. Claims 4 and 9-17 are allowed.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
8. A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 3738

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
